Insertion Magnetic Flow Meter
For Accurate Flow Measurement in Full Pipes

Insertion Magmeter

ISM 5.0
Transmits Flow in a Wide Range of Pipe Sizes

The Accurate, Low Cost Alternative to Full-bore Magnetic Flow Meters

Measures Flow of Conductive Liquids in a Wide Range of Pipe Sizes

Accurate and Versatile
The ISM 5.0 Insertion Magmeter senses flow using a low maintenance electromagnetic design with no moving parts. The dual-electrode sensor and continuous auto-zero function provides high accuracy – even at low flow rates. State-of-the-art electronics and patented design features help maintain its NIST traceable accuracy over time.

Installs in Pressurized Pipes Without Shutting Down Flow
The simplified hot tap insertion design allows for ISM 5.0 insertion and removal by hand, without a system shutdown.
Simple Low-Cost Installation

How It Works
The ISM 5.0 Insertion Magmeter operates based on Faraday's Law of electromagnetic induction: as flow velocity of a liquid increases through the magnetic field generated by the sensor head of the ISM flow meter, electrodes measure the voltage increase to accurately calculate flow. Four electrodes measure the induced voltage on opposite sides of the sensor. The voltage readings are sampled and averaged.

The ISM 5.0 Insertion Magmeter measures flow of electrically conductive liquids (20 µS/cm or greater) in full pipes. For proper measurement on plastic pipes the electromagnetic flow meter requires electrical grounding by connection to grounding rings or ground probes inserted into the pipe. Readings are not affected by the fluid temperature, pressure or viscosity.

Installation is Easy
The ISM 5.0 Insertion Magmeter installs in the pipe through a full port ball valve so the sensor can be easily retracted without having to shut down flow or drain the system. The insertion depth is adjustable according to the pipe diameter. An insertion depth gage is supplied with each flowmeter.

The optional Standard Installation Hardware Kit includes a branch outlet, close nipple and full port 1” isolation valve.

Hot Tap Installation
For applications where the ISM 5.0 will be installed in pressurized pipes, use the optional Hot Tap Installation Hardware Kit. It includes a branch outlet, close nipple and 1-1/4” full port ball valve.

Straight Pipe Requirements
The ISM 5.0 provides installed accuracy of ±1% of flow reading in most applications. This high accuracy is achieved by locating the sensor at a sufficient distance from upstream or downstream disturbances where a fully developed flow profile will occur. Recommended mounting location is 10 pipe diameters from upstream elbows and 30 diameters from control valves. The flowmeter should also be installed 5 pipe diameters from downstream obstructions.

Electrical Grounding
The ISM 5.0 Insertion Magmeter is designed to detect microvolt signal levels at the electrodes on the sensor head so care must be taken to minimize random electrical noise by Grounding.

For properly grounded steel or copper pipe, connection to the pipe itself is normally a sufficient earth ground. Plastic or lined pipes typically require installation of Grounding Rings for flange installation, or Grounding Probes can be used for insertion into the pipe. In both cases the Grounding devices are installed a short distance up and downstream from the ISM 5.0 flowmeter.
## Insertion Magmeter Specifications

### General Specifications

**Greyline ISM 5.0 Insertion Magmeter**

- **Flow Measurement Range:** 0.1 to 20 ft/sec (0.03 to 6 m/sec), 200:1 turndown
- **Accuracy:** ±1.0% of reading from 2 to 20 ft/sec (0.6 to 6.0 m/sec)
- **Nominal Pipe Size:** 3” to 72” diameter (DN 75 mm to 1800 mm)
- **Liquid Temperature Range:** -15°F to 250°F (-26 to 121°C)
- **Electronics Operating Temperature:** -20°F to 150°F (-28° to 65°C)
- **Maximum Operating Pressure:** 200 psi (14 bar)
- **Pressure Drop:** Less than 0.1 psi (0.007 bar) at 12 ft/sec (3.65 m/sec)
- **Conductivity Range:** 20 to 60,000 μSiemens/cm
- **Power Input:** 20-28 VDC, 250mA @24VDC (6 Watts)
- **Analog Output:** Selectable 4-20mA, 0-5V or 0-10V
- **Frequency Output:** 20-28, 50-60Hz, 8VA
- **Scalable Pulse Output:** Selectable 4-20mA, 0-5V or 0-10V
- **Signal Cable Length:** 200 peak pulse, 0-500Hz
- **Electronics Enclosure:** Watertight, airtight, dust proof (IP 68) powder coated cast aluminum
- **Wetted Materials:** 316L stainless steel, polypropylene
- **Approximate Shipping Weight:** 6 lbs (2.75 kg)

### Options

- **Model ISM 5.0-B**
- **Extra Sensor Cable:** For bi-directional flow
- **Standard Installation Hardware Kit:** separate length 25, 50 or 100 ft (7.6, 15 or 30 m) PVC jacketed multi-conductor
- **Hot Tap Installation Hardware Kit:** Threaded branch outlet, close nipple, 1” full port isolation valve
- **Grounding Rings:** ANSI Class 150, 316 Stainless Steel from 3 to 42” nominal size
- **Grounding Probes:** ANSI Class 150, 316 Stainless Steel from 3 to 42” nominal size
- **Remote Displays:** D-100-MOD rate/total display with 2 analog inputs, Modbus RTU or TCP/IP
  
### Typical Installation

- **Output signal(s)** to control system
- **Connect factory wires to field wires in appropriate junction box.**
- **Allow enough slack in the flexible conduit to permit the meter to be removed from the valve.**
- **1¼” FNPT conduit connection**
- **Insertion depth gage provided with each meter**
- **Standard Installation Kit for Steel Pipe**
- **1” Full port ball valve**
- **1” Close nipple**
- **1” Branch outlet**
- **1¼” for hot tap**
- **CLEARANCE REQUIRED FOR INSTALLATION**
  
Typically 30-36” (750-900 mm) depending on pipe size and height of valve assembly

### Note:

Installation kits vary based on pipe material and application.

For installations in pressurized (live) systems, use "Hot tap" 1¼ inch installation kit and drill hole using a 1 inch wet tap drill.
New ISM 5.0 Insertion Mag Meter for Flow Measurement of Conductive Liquids

**Use it for:**
- Potable Water
- Water Distribution
- Pumping Stations
- Filter Balancing and Backwash
- Reclaimed Water
- Treated Water
- Irrigation Water
- Cooling Water
- Raw Water

**Simplified Flow Measurement in Full Pipes**

The ISM 5.0 Insertion Magmeter is a low cost alternative to full bore magnetic flow meters. The dual pair electrode sensor inserts through a tap in the pipe wall. It can be easily installed in new pipe systems or by hot tap in pressurised pipes with flowing liquids.

There are no moving parts so obstruction to flow and pressure drop is minimal. Installation through a full port ball valve allows easy retraction and reinsertion without shutting down flow.

**No Onsite Calibration Required**

Based on your pipe type and size, liquid and flow rate each ISM 5.0 Insertion Magmeter is shipped from our factory configured for your application and ready to install. Connect the isolated 4-20mA output to control system or remote display, or use the relay pulse output.

Accurately measure a wide range of flow rates in plastic or metal pipes.

The ISM 5.0 electronics housing and signal cable are fully waterproof (IP 68) for installation in meter pits or manholes where flooding may occur.

**Versatile and Reliable**

**How to Order**

Contact a Greyline sales representative in your area or phone one of our sales engineers. Describe your requirements and receive our prompt quotation.

**Applications Support**

Take advantage of Greyline's applications experience. Phone toll free 1-888-473-9546 for advice on applications, installation or service for Greyline instruments.

**No Risk Appraisal**

The ISM 5.0 Insertion Magmeter must meet your requirements. Discuss your application with a Greyline representative to arrange a performance test.

**The Greyline Guarantee**

Quality of Materials and Workmanship - Each instrument manufactured by Greyline is warranted against defects in materials and workmanship for a period of one year from date of purchase. Refer to our limited warranty included with each product.
